DETAILED ACTION***Allowable Subject Matter***

1. Claims 1-44 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of claims 1, 22, 37 and 40 is the inclusion of the elements and/or method steps of a liquid sampler, or obtaining samples of liquid from a vessel/tank by introducing a probe through a connecting device, the probe having an inlet, wherein the inlet is closed during insertion into the vessel/tank, and opened when fully inserted, obtaining a liquid sample, the probe inlet then closed before retracting via an opening and closing means for the prevention of contamination of the liquid sample due to sediments in proximity to the interior surfaces of the vessel/tank, typically present during the fermentation process creating fermented drinks, such as wine. The closest reasonable Prior Art reference is US 4,294,124 to Kalwaitis (see Fig. 1 below) which teaches a sampling device having a probe with an inlet that is in a continuous open state.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jaeger, Hill, Ueno et al., McDermott et al., Travor et al., McGuckin, Leopold et al., Jarrett, Handel, Lennon and Hill all disclose liquid samplers having certain aspects similar to the instant invention.
